BILLING CODE 6717-01-M

[Docket Nos. CP93-685-000 and CP93-685-001]

Tuscarora Gas Transmission Company; Notice of Availability of the Final Environmental Impact Report/Environmental Impact Statement for the Proposed Tuscarora Pipeline Project

April 28, 1995.

The staffs of the Federal Energy Regulatory Commission (FERC) and the California State Lands Commission (SLC) have prepared a Final Environmental Impact Report/Environmental Impact Statement (FEIR/EIS) on the natural gas pipeline facilities proposed by Tuscarora Gas Transmission Company (Tuscarora) in the above-referenced dockets.

The FEIR/EIS was prepared to satisfy the requirements of the National Environmental Policy Act and the California Environmental Quality Act.

The FERC and the SLC staffs conclude that approval of the proposed project, with appropriate mitigating measures including receipt of necessary permits and approvals, has the potential to significantly impact the environment. The FEIR/EIS evaluates alternatives to the proposal.

The FEIR/EIS assesses the potential environmental effects of the construction and operation of the proposed Tuscarora Pipeline Project, which includes the following facilities:

- One 229-mile, 20-inch-diameter pipeline between Malin, Oregon and Tracy, Nevada, (the Tuscarora mainline). The Tuscarora mainline would interconnect with the Pacific Gas Transmission Company's mainline at Malin;
- One 4.42-mile, 4-inch-diameter lateral between the Tuscarora mainline and Alturas, California (the Alturas Lateral);
- One 10.61-mile, 6-inch-diameter lateral between the Tuscarora mainline and a point near Susanville, California (the Susanville Lateral);
- One 5.45-mile, 4-inch-diameter lateral between the Tuscarora mainline and the Sierra Army Depot near Herlong, California (the Herlong Lateral);
- Five meter stations located in Alturas, Susanville, and Herlong (Sierra Army Depot) California; and near Spanish Springs and Tracy, Nevada; and
- Twelve mainline valves.

The project gas would be used to generate electrical power at the Sierra Pacific Company (SPPC) power plant in Tracy, Nevada. A total of 113,050 dekatherms of gas per day (Dkt/d) would be provided. Part of the supply would also service municipal, commercial, and industrial uses in the areas around Reno, Nevada; the California cities of Alturas and Susanville; and at the Sierra Army Depot in the Herlong area.

The FEIR/EIS will be used in regulatory decision making process at the FERC. While the period for filing interventions in this case has expired, motions to intervene out-of-time can be filed with the FERC in accordance with the Commission's Rules of Practice and Procedure, 18 CFR 385.214(d). Further, anyone desiring to file a protest with the FERC should do so in accordance with 18 CFR 385.211.

The SLC is expected to certify the FEIR/EIS and act on the application of the Tuscarora Gas Transmission Company at its regularly scheduled meeting in May or June. Interested parties will be notified of the date, time, and place of the meeting when it is scheduled. The SLC will accept written
